Code of Conduct for Suppliers

BioMar Group

Kalkværksvej 16, 15.
8000 Aarhus C
Denmark

www.biomar.com

At BioMar, we care about our planet and its people. We are dedicated to innovating for an efficient and

sustainable aquaculture, doing our part in developing this global industry. Raw materials count for an important part of our impact on people and planet. Therefore, BioMar is committed to ensure responsible

sourcing of raw materials.

BioMar acknowledges that a sustainable business must be built ensuring the fundamental protection and

promotion of people and our planet. We are determined to bring integrity, sustainability, and human rights commitment to all stages of our value chain, and we are committed to collaborate with stakeholders

adhering to the same standards as we do.

The BioMar Code of Conduct for Suppliers sets out requirements within below areas corresponding with our

fundamental principles of responsible sourcing:

- Conduct business lawfully and with integrity
- Ensure product quality and food safety
- Protect natural resources
- Uphold human and labour rights

The Term "Supplier(s)" in this document refers to any company, organisation or, individual engaging in supply of

raw materials to BioMar and includes but are not limited to: Producers, Traders, Contractors, Sub-contractors etc.

Reference to "Worker(s)" in this document, means any individual employee, whether they are: full time, part-time,

fixed-term, permanent or trainees, contractors, temporary staff, secondees, and work-experience placements.

As a minimum, every supplier must adhere to these requirements and possess all required legal licenses and permits

for their operations. In case of any non-compliance with the BioMar Code of Conduct for Suppliers, BioMar will

demand corrective measures to be taken and will terminate any agreement and collaboration if non-compliances

are not resolved.

All suppliers must declare compliance with the BioMar Code of Conduct for Suppliers. BioMar must be informed

immediately if any material change(s) in compliance occur, and suppliers must communicate an equivalent set of

requirements to their suppliers.

BioMar shall be permitted to and will regularly audit compliance with the requirements set out in the Code of

Conduct for Suppliers.

Conduct Business Lawfully and with Integrity

Our suppliers must commit to conducting their

business in compliance with all local and international

laws such as but not limited to antitrust and competition

laws. There is to be free and fair competition and full

prohibition of any form of bribery, corruption, extortion,

and embezzlement.

all relevant suppliers must disclose the presence

of genetically modified organisms or

ingredients

produced from genetically modified organisms in all

products supplied. In addition, all active compounds

and inclusion levels of added antibiotics or other

added medicinal feed additives for each product must be disclosed.

Protect Natural Resources

Suppliers must not use any confidential and proprietary

We require our suppliers to commit to a sustainable information and materials related to feed composition development and suppliers shall comply with all and manufacturing technology other than for the applicable environmental-related laws and regulations purpose agreed with BioMar. There must be no and maintain a management system for compliance disclose of any such confidential information to third with them to secure this development. Furthermore, all parties. Furthermore, suppliers must take reasonable suppliers are required to adhere to the requirements precautions to prevent unauthorized disclosure of such on sourcing and sustainability set out in our confidential information.

SBTi guidance and tools available to set science-based targets. SBTi validation is recommended, but not mandatory.

Water, Waste, and Effluent Management

Suppliers must identify all sources of water used, types of waste generated (hazardous and

Uphold Human and Labour Rights

Respecting and promoting human rights is essential for living our purpose in BioMar and we believe that all human beings should be met and treated with dignity and respect. We are committed to upholding human rights and complying with universal human

Where not provided by a State/National social security/ rights principles as stated in UN's UDHR, UNCRC, the health system, insurance for all employees for work-conventions of ILO, the ETI, and the conventions of related accidents or injuries must be provided; this WHO, and we require our suppliers to do likewise at the includes as a minimum the cost for transport and medical same time making all employees aware of their labour-treatment/medication needed to treat the accident or related rights¹.

Health and Safety

Suppliers are to provide a safe and healthy workplace environment and a health and safety risk assessment must be conducted and signed-off by responsible management and reviewed on a regular basis. The risk assessments must contain: Risk of physical injuries and Risk of mental injuries (in both areas, acute or chronic) in the working environment. Appropriate measures of monitoring and effectiveness must be implemented, and the risk assessment repeated depending on monitoring outcome. Effective implementations include appropriate health and safety notices/ instructions in the workplace, appropriate equipment

maintenance, appropriate training
for employees
including on emergency responses, and Personal
Protective Equipment (PPE). All (PPE) must be free of
charge and according to the need defined in the health
and safety instructions in the workplace.

Workers shall be allowed to freely move around the
workplace to use sanitary facilities and have access to
drinking water during their work shift. Furthermore,
all workers shall be allowed to leave the site once
scheduled working time or agreed overtime has been
completed. Reasonable and safe transportation shall
be offered to employees when the workplace is not
readily accessible and public transportation is not
available; allowing employees to leave the site once
their shift is over.

Adequate First Aid (including supplies) must be
provided and administered by qualified personnel in
the event of a work-related injury; this includes access
to professional support such as an ambulance.
injury, the cost for transport and medical treatment/
medication needed for recovery, compensation for
lost working hours, as well as the cost for any required
repatriation in case of migrant workers.

Designated area to prepare food and eat during breaks must be accessible. If employer-operated stores and services are available, purchase from these is not required and cost is reasonable with no profit gained of employees.

Suitable areas for breast feeding women must be available and additional workday breaks for pregnant and breast-feeding women shall be allowed;

nursing breaks shall be counted as working time and remunerated accordingly.

Employment Practices

Forced, bonded, or compulsory labour or involuntary prison labour is not to be used or supported including any forms of slavery and human trafficking. Nor is child labour to be engaged in or supported following the UNCRC and the ILO. No children should be deprived of their childhood, or the opportunity of schooling and no harmful effect should ever be afflicted upon a child's physical or mental development.

All work must be voluntary and not under threat of penalty or sanctions, and in all cases follow the ILO conventions as must employments. Suppliers shall inform all employees that they are free to join or form

workers' organisations of their own choosing, and that they are free to bargain collectively.
