Environmental & Energy Policy

BioMar Group

Kalkværksvej 16, 15.

8000 Aarhus C

Denmark

www.biomar.com

As a global manufacturer of high performance aquafeeds, BioMar strives to meet its customers' needs in an environmentally responsible and sustainable way. We are committed to operating responsibly in the direct operations we control, and throughout the wider supply chain that we influence.

BioMar strives to minimise our impact on the surrounding environment and promote the long-term environmental and economic sustainability of our operations. We also strive to demonstrate care for communities where we operate, and the health and welfare of our employees.

At BioMar, we will:

- Comply with all legal and other requirements governing environmental and energy management in
 - the countries where we operate. We will implement environmental and energy efficiency management
 - practices and monitor compliance with them
 - Understand our impacts on the environment and communities in which we operate and proactively
 - put in place management plans to minimise these impacts, with special attention to mitigation and
 - adaptation measures to the effects of climate change
 - Monitor our operational performance through a set of key metrics and set targets for continuous
 - improvement and publish our targets and performance on an annual basis through our
 - Sustainability Report
 - Ensure that the responsibility of environmental and energy matters is properly assigned, accepted,
 - and fulfilled at all levels of the organisation and that all practical steps are taken to safeguard the
 - environment in the processes under its control
 - Raise awareness, encourage participation, and
- train employees

in environmental and

energy matters

- Minimise the generation of emissions and waste (process waste, odour, effluent discharges, GHG
- emissions, packaging and energy waste), as well as control the efficient use of water and energy
- Consider the environmental impact and energy performance in the procurement and design of
- changes and improvements to facilities, equipment, systems, processes and associated services
- Promote the continuous

improvement of environmental
impacts and energy performance
management

This policy applies to all BioMar Group operating companies in which BioMar maintains operational control. It will be periodically reviewed by the BioMar Executive Committee and updated as appropriate to ensure our objectives are achieved. Revisions will be published and brought to the attention of all employees and relevant parties.
